

Alarm Radio with Flying Soucer:

Tune your AM radio to a frequency where no one is transmitting. Turn the switch (S1) on and place the project next to the radio and use the variable capacitor to fine tune the signal. You will hear alarm sounds. Using the press switch (S2) will change alarm sound and launch the flying saucer.

This circuit was created by Carol from California

Requires SC-300 or larger parts set.

WARNING: Moving parts. Do not touch the fan or motor during operation.

WARNING: Do not lean over the motor.
